For Immediate Release

Nylok Appoints Rob Monahan
Product Applications Engineer

Nylok Corporation, a worldwide leader in the design and production of value-added coatings for fastener products, has announced the appointment of Rob Monahan to the new position of Product Applications Engineer.

The announcement was made by Nilo Urbani, Vice President of Sales and Marketing, who said the staff expansion helps Nylok meet a growing demand for its increasing number of products and will assist existing and new customers to better understand the benefits of Nylok's exclusive products.

Mr. Monahan joined Nylok in 1997 as Plant Superintendent for its Macomb, Mich. manufacturing facility and was promoted to Plant Manager a couple of years later. He also was Quality Assurance Manager for a year-and-a-half, where he strengthened his knowledge about Nylok product applications and relationships with customers. A native of Mount Clemens, Mich., Mr. Monahan lives with his wife and three children in Richmond, Mich.

Nylok, headquartered in Macomb, Mich., and a member of the Marmon group of companies, holds more patents for innovative fastener technology than any other company. It also has built a reputation throughout the world for "INNOVATION" in developing new products that solve assembly challenges.

For more information, visit the Nylok website at www.nylok.com.
